

Nogatech USB Micro Cam™

High Quality USB Digital Video Camera

Imagine simply plugging in your camera and seeing full-motion live video within seconds. That's all it takes to install the Nogatech USB Micro Cam on your desktop or notebook computer! With the Nogatech USB Micro Cam you can creatively incorporate video clips and still images into your web pages or presentations. Imagine sharing video clips and still images of family events or business meetings by sending them as video mail or by video conferencing using software such as Microsoft® NetMeeting™. With the Nogatech USB Micro Cam you can do all this using popular video and imaging applications.

The Nogatech USB Micro Cam is the ideal way to bring video and still images into your desktop or notebook computer. Nogatech's advanced compression technology and software enable unparalleled throughput of up to 30 frames per second, for CIF size color images (352 x 288). This gives the user superior live video performance, while using minimal CPU resources.

Installation is a true plug and play experience. Install the included software drivers, connect the Nogatech USB Micro Cam to your computer and now you are ready to begin capturing live video and creating amazing still images.

Advantages

Approximately 0.13lb. (0.07kg.) and 12.5 in x 6 in x 2.5 in (32 cm x 15 cm x 6 cm)

Part number: NV300X

Nogatech USB Live!™

USB Video Capture Cable Adapter

Suppose that bringing video into your computer was as easy as hooking up to the Internet. With the Nogatech USB Live!, it is even easier! You can now quickly capture video onto your computer for video communication applications, such as video mail and video conferencing, and for multimedia and desktop applications, such as video and still image capture, web site development, video streaming, and video editing. Nogatech USB Live! captures live video that you can view and use with all popular video and imaging capture applications.

The Nogatech USB Live! is the ideal way to bring video and still images into your computer from various standard video sources, such as computer video cameras, camcorders, DVD, VCRs or TV tuners. Nogatech's advanced compression technology and software enable unparalleled throughput of up to 30 frames per second, for CIF size color images (352 x 288). This gives the user superior live video performance, while using minimal CPU resources.

Installation is a true plug and play experience. Install the included software drivers, connect the Nogatech USB Live's streamlined USB cable to your computer and attach your camcorder or any other video source to the Nogatech USB Live's video input cable or S-video cable. Now you are ready to begin capturing live video and creating amazing still images.
